Description

Quantity:

We are looking for a QA/QC (Tester) to undertake E-commerce projects for our company. If you have a strong passion and look for a long-term career in E-commerce Field in a fast-paced company, you are welcome to be a member of DOA Group.

About Us:

Founded in 2016, DOA Group is a passionate & professional Cross-border E-Commerce & Tech startup based in Vietnam, and mainly focuses on the global markets such as US, Canada, Europe and Australia, to make the spirit of going global made easy happened. Currently, we are operating over 20 e-commerce brands in foreign markets and still growing, powered by our modern technology & management system. We make great designs and build awesome products that people will love!

“Our Mission is to disrupt E-commerce & Tech boundaries”

In the context of E-Commerce is constantly changing, the ideal candidate is extremely passionate about E-commerce who are a highly motivated person with a can-do spirit, resourceful, imaginative, energetic, and flexible – even in the face of deadlines and budget pressure.

Key Tasks & Responsibilities:

- Test E – Commerce Websites in various languages like English.
- Thoroughly test products through all phases of the development life cycle (functional testing, regression/integration testing, performance testing).
- Develop and document test cases based on business requirements, functional and technical requirements, user stories and business use cases.
- Report and track defects, and work closely with developers in defecting resolution.
- Troubleshoot issues and read log files.
- Provide test status updates and defect report.
- Meet tight deadlines while maintaining a certain standard and quality of work.

Qualifications & Requirements:

- At least 2 years of working experience in testing E – Commerce websites or web-based applications.
- Solid understanding of software QA/QC methodologies, tools and processes.
- Experienced in analyzing business requirements and use cases.
- Proficient on system testing techniques.
- Proven diagnostic and debugging skills.
