Senior Front-end Software Engineer

Quantity: 01

We are looking for a rockstar Senior Front-end Software Engineer to undertake our technology projects, develop web & software products for our company. If you have a strong passion and look for a long-term career in Technology & Engineering Field in a fast-paced startup company, you are welcome to be one of the first members of the Dev Team at DOA Group.

About Us:

Founded in 2016, DOA Group is a passionate & professional Cross-border E-Commerce & Tech startup based in Vietnam, and mainly focuses on the global markets such as US, Canada, Europe and Australia, to make the spirit of going global made easy happened. Currently, we are operating over 20 e-commerce brands in foreign markets and still growing, powered by our modern technology & management system. We make great designs and build awesome products that people will love!

“Our Mission is to disrupt E-commerce & Tech boundaries”

In the context of E-Commerce is constantly changing very fast, the ideal candidate is extremely passionate about Software/Web Development in E-Commerce field who are a highly motivated person with a can-do spirit, logical, professional, resourceful, imaginative, energetic, and flexible – even in the face of deadlines and budget pressure.

Key Tasks & Responsibilities:

- Develop existing and future branding e-commerce websites and technical products (web apps / plugins / extensions) in E-Commerce field (SaaS model), mainly on WooCommerce/Shopify platforms.
- Analysis, design and build the scalable services, systems, APIs for system integration.
- Participate in building and upgrading new/existing systems and products to ensure stability and extremely high load capacity.
- Solve complex performance problems and architectural challenges.
- Proposing new technology solutions and trends to improve product quality.
- Doing in problems is as difficult as: Development of core micro-service framework; Technology support tools for products.
- Optimize high-speed systems/websites to handle large amounts of data and traffic.
- Work closely with the technical writers to generate developer docs for integration.
- Communicate strongly and frequently with other cross-functional teams to solve their technical issues related to product development.
- Play a lead role either in terms of technical development and architecture, or
